

O2 Power Sustainability Policy

O2 power is committed to being a responsible corporate and model of sustainability by contributing to an environmentally, socially, and economically sustainable future. O2 Power will adopt best sustainable developments practices in its current project and O&M activities, applicable for stakeholders and the communities, we collaborate with.

As a responsible corporate citizen, O2 Power is constantly engaged in transferring values to its all stakeholders through its commitment towards **all UNDPs Sustainable Development Goals and prioritizing to implement O2 Power projects on most relevant Seven Sustainable Development Goals**. O2 Power will further work on other UNDPs Sustainable Development Goals as per organizational needs

As a green energy company, we manage resources efficiently and constantly care about environmental protection, ecological balance, Biodiversity, Occupational health, and Safety for all our direct and indirect employees as well as every area of operations.

The objectives shall be achieved through.:

1. Recognizing its responsibility towards the protection of environments.
2. Complying with all environmental and social legislation.
3. Measuring the record level of waste, energy, and water use and creating a baseline.
4. Raising awareness and encouraging participation in dealing with all Environmental and Social matters through communication and participation.
5. Improving efficiencies in all activities and reducing cost in organization and Environment protection.

The policy shall be reviewed every year to ensure its effectiveness.
